NEWS FROM THE FLORA OF VIRGINIA PROJECT

KIWI!

Coming soon to a Flora near you.

A familiar newcomer, *Actinidia chinensis* (Actinidiaceae, the Chinese Gooseberry family). The Digital Atlas maps it in four counties, rather far-flung. Stay tuned to see how sweet the news is.

2018

Still time to give before it's history.

The *Flora* and the Mobile App were made possible by donations from you, our supporters. Please let us hear from you again, as the year winds down. Help us Keep the Science Current!

[Click here](#) to donate now on our website. Or mail your check to Flora of Virginia Project, P.O. Box 512, Richmond, Va. 23218. Thank you!

UH-OH!

Getting a new phone?

Fret not! No need to pay for the Flora App again. Log onto Google Play or the App Store with the e-mail address you used to buy the App and download it for your new phone—for free!

K12!

VAST, a grand opportunity to showcase the App.

Ann Regn, left, and Jan Hodges tend the booth of the Virginia Resource-Use Education Council and—thanks to the council—of the Flora Project. The council also gave a copy of the Flora App to educators attending the workshop we offered on using the App. A great annual meeting of the Virginia Association of Science Teachers, in Williamsburg.
